Just a few suggestions for breakfast appetizers these warm mornings:

**Kellogg's Rice Krispies**  
**Kellogg's Bran Flakes**  
**Kellogg's Pep**  
**Kellogg's Corn Flakes**  
**Quaker Corn Flakes**  
**Quaker Puffed Rice**  
**Quaker Puffed Wheat**  
**Quick Quaker Rolled Oats**  
**Grape Nuts**  
Also Grape Fruit and Cantaloupes

**Hon. R. B. BENNETT**  
New Premier of Canada.

## Decorating Course Highly Successful

The Interior Decorating course which was held in the United Church on July 19, 21, and 22 under the guidance of Miss Hutton, proved to be a great treat to each and all of those who participated. On Saturday morning there was a very pleasing address on color schemes, materials etc. In the afternoon a number of the articles collected were finished in mosaic and enamel. It was so very rainy that day that not many were able to get to the class, however those who were there got so enthused that on the remaining two days of the course there was no lack of students or articles to beautify. If, as was stated, one lady decorated one side of her frying pan with ham and eggs and painted speckled trout on the other side, your correspondent did not see that, but some four hundred and fifty things were glorified with mosaic, lacquer, fire bronze, gold, stipple work, drip work and stencil.

Some of the class did not get half enough done and are planning to have another "bee" some time in the autumn when they will have assembled more things to re-juvenate or re-condition.

The W.I. committee in charge—Mrs. Hummell and Mrs. La-tiff worked like beavers and were stoutly assisted by other members of the class. During her short visit Miss Hutton was entertained at dinner at Mrs. Hummell's, luncheon at Mrs. Beaubier's and tea at Mrs. Alexander's.

Robert Gardiner addressed a small audience in the Community Hall on Saturday afternoon, the time of day not being favorable to a big turnout. Those present were treated to a masterful handling of the issues before the electors and should Mr. Gardner again make an appearance here he would undoubtedly have a more satisfactory audience.

## Conservatives

### Win In A Walk

While there are still two seats in doubt the result of the election is such a complete Conservative victory that any future changes will not affect the result. Present figures give the new government a majority of fifteen over all other parties combined.

Conservatives	138
Liberals	85
United Farmers	10
Progressives	2
Liberal Progressives	3
Labor	3
Independents	2
Doubtful	2
Total	245

### By Provinces

Manitoba—Liberal 1, Conservative 11, Labor 2, Liberal-Progressive 3.	
Saskatchewan—Liberal 11, Conservative 8, Progressive 2.	
Alberta—Liberal 3, Conservative 4, United Farmer 9.	
British Columbia—Liberal 5, Conservative 7, Labor 1, Independent 1.	
Yukon—Conservative 1.	

### COMMUNICATION.

#### EXPLANATORY

An explanation to the tax payers of the Champion Consolidated School District, No. 40, of my retirement from the Board of Trustees before the expiration of my term.

This was occasioned by the board's dispensing with the services of the present janitor, Mr. S. C. Milliken, after seven years faithful service without giving any satisfactory reason for his dismissal.

The school buildings, grounds and general equipment bear silent testimony to Mr. Milliken's ability to fill the position of janitor.

Another feature was the hiring of outside help, without giving our local people a proper opportunity to fill the position.

I felt that the Board of Trustees was not using good judgment nor showing proper consideration for anyone concerned; hence my retirement.

(Signed) A. McCULLOUGH.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist 208-8th Ave West, Calgary will make his monthly visit to Champion Friday, August 1, at the Drug Store.

NOTES AND COMMENT.

The verdict of the electors of the Dominion on July 28th was sufficiently emphatic to suit everyone. While efforts are being made in every direction to show the reason for the big turnover it is quite likely that the guesses are in most instances doubtful material to depend upon. The gain of 21 seats in Quebec by the Conservatives was the most outstanding feature of the election. It has always been conceded, however, that Quebec is naturally a high protection province, and that other reasons for voting Liberal were overbalanced by this consideration as is likely an explanation as any. Undoubtedly the general depression in business and unemployment were considerable factors. The new government has a sufficient majority to carry out any policies they may desire without help from anyone, a situation which will be approved by the great majority. It is understood McKenzie King has already tendered his resignation and an early session of parliament with Mr. Bennett at the head of affairs is assured.

A section of pool members in Saskatchewan is insisting on bringing the question of a compulsory pool before that organization at the earliest possible time. Naturally the leaders in the pool movement are not in favor of advancing this idea at the present time when the pool is at the lowest ebb in public estimation it has suffered and it is likely the matter will be kept as far in the background as possible until there is a change in pool status. Any government attempting to legislate a compulsory pool at the present time would meet with such a storm of protest that it is very doubtful whether any representations, could be made which would induce such action.

Harvest is with us again. Barley and rye have already been cut and the wheat is turning in color in many fields, indicating that it will not be long before combines and binders will be in active operation in the big staple crop. Combines and other harvesting machines are being prepared for the occasion, which is naturally the most important of the year on the farms. While there are many beautiful fields of grain it is not anticipated the average yield will reach much above the twenty bushel mark. And, by the way, the crops in this vicinity are better than in many other parts of the country.

The statement of J. S. Woodworth, Labor member for Winnipeg, that the labor party will support the new government if their policies are satisfactory will relieve Mr. Bennett wonderfully. How long will it take the five groups to realize that they are completely out of the picture? With the exception of the U.F.A., who all but held their own, one feature of the election was the almost com-

plete elimination of "groups." This province is the only one that believes in the group system and the figures this year show a considerable falling off from previous elections.

The only high spot for the Liberals in the election was the defeat of Gen. McTavish and H. H. Stevens in Vancouver. The only explanation offered that seems to fit is that the people of Vancouver just became tired of being Conservative all the time.

On Wednesday wheat reached the lowest figure, 87c per bushel at Fort William, since seventeen years ago in 1913. Surely this must be the bottom.

# Canada Has Maintained Lead In Silver Fox Ranching Industry, Which Is Steadily Growing

Canada was the first to develop the breeding of silver foxes in captivity and she has maintained her position in this respect that she is regarded as a world leader by all other countries, whose representatives periodically visit the Dominion in search of knowledge and advice in the conduct of similar undertakings. While silver fox ranching has been exploited here and there by individuals who have been attracted to its financial possibilities, yet the industry as a whole has developed along sound and economic lines, due in the first place to the foresight of the pioneers and to the valid and conservative methods of the fox breeders of Prince Edward Island who nursed the silver fox industry through its infancy.

The Canadian National Silver Fox Breeders' Association is the largest breed society in the Dominion and registers annually a larger number of pedigreed animals than is to be found in any other country of live stock. The 70,883 silver fox pups born in 1929, and registered by this association, are determined to be more than a score of silver foxes taken from the wild by the pioneer breeder, Mr. J. H. Grisdale. The remarkable record of the silver fox industry is indicated by the figures of the last four years, taken from Canadian Live Stock records, of silver fox pups registered by the above association: 1926, 32,205; 1927, 39,767; 1928, 51,024; 1929, 70,883.

While Prince Edward Island is still the cradle and the home of the industry, silver fox ranching is being firmly established in practically every province of the Dominion, and is operating on a very large scale, more particularly in the province of Quebec. Silver fox ranching has also become established in a great number of European countries and the shipments of live foxes are made annually from Canada, 2,558 having been exported from Prince Edward Island alone in 1929.

While there has been a larger sale of live silver foxes as breeding stock during the last few years than before, yet these animals represent only about 25 per cent. of the silver foxes produced. The main function of silver fox ranching is the production of pelts. In fact, large number of the ranches are no longer interested in the sale of live foxes. As a consequence there has been a rapid increase in the number of silver fox pelts coming into the market, but, as the number has increased, a wider and more general interest has been shown in silver fox furs by the fur buyers and by the fur trade as a whole. This has resulted, generally speaking, in a steady increase in the prices obtained for silver fox furs. Of course, as was to be expected, the financial stringency of last autumn had a marked effect on the prices of all pelts at the December and January fur sales, but silver fox furs were less affected than any other class.

During the last two decades of the 19th century before foxes were raised in captivity, it has been estimated that between 2,000 and 3,000 silver fox pelts were placed upon the market annually. For the past two years over 100,000 silver fox pelts have been absorbed each year by the fur trade, and, as the number of pelts which animals has not increased, it is estimated that wild pelts comprise only about 2,000 of this number. This estimate is confirmed by the fact that at the different fur auctions pelts of wild foxes formed less than two per cent. of the total offerings.

## New School For Indian Reserve

It is officially reported that \$60,000 is to be spent on improvements to buildings in the Indian Reserve at Gleichen this summer. The finishing touches are now being put on the new school recently built on the Reserve at Gleichen.

## Heavy Livestock Losses

Cattle and Pigs Die From Bot Fly Plague

From eastern Saskatchewan have come reports of considerable damage to cattle and hogs from the attacks of a small fly. A species of tiny black fly, known as Simulium, is causing heavy livestock losses on farms near Saskatchewan River, where the flies breed. In the Pike Lake district, at least seven head of cattle and three pigs have died from the effects of the flies' bites.

Eggs of the flies are laid on exposed stones near running water. When the river rises and the water washes over the stones the friction causes the eggs to hatch.

When the flies are thick, animals should be housed, the University of Saskatchewan veterinary department advises, and baking soda and water should be used to reduce swelling and lessen pain.

## Favourite Canadian Apples

McIntosh, Spy, Gravenstein, Delicious and Baldwin are the Favourites  
Canada has a wide range of apple varieties and the question as to which of these is the most popular provides a good deal of interest. In a survey conducted by the Fruit Branch of the Dominion Department of Agriculture, the McIntosh was shown to have a marked preference in Canada generally. Next came the Spy, then the Gravenstein, then Delicious, and then the Baldwin.

W. N. U. 1848

"The Western Pioneer," of Winnipeg, in publishing the illustration reproduced here says: "Canadian (Western) hides have a rather bad name among tanners, due to the fact that so many of them carry large brands on the most desirable part of the hide. Front quarter brands are least likely to spoil a hide."

## Grain By Bay Route

Seventy-One Years Ago Grain Was Imported From Britain Into Hudson Bay

Workers are toiling today on the steel and concrete framework of the grain elevator at Churchill, to aid in the movement of the 1931 wheat crop over the Hudson Bay route. But 71 years ago the Bay route was used for the shipment of wheat—at that time to the prairies which now supply consumers in all parts of the world.

In 1860 some eleven thousand bushels of wheat and seven thousand bushels of flour were imported for prairie settlers. The bulk of these supplies came from Red River (now Winnipeg), in the round-bottomed sailing vessels which braved the dangers of the northern route. Seventeen years later Manitoba shipped out its first wheat down the river to Duluth, Minnesota, and thence by rail to Toronto.

In the interim the western prairies have swelled their grain producing capacity until half-billion bushels crops have become an actuality. And advancing trade is preparing to move out over a bay route used by grandfathers of folk who look today.

## Study Sheep Industry

Will Make Economic Survey Of Sheep Raising In The West

Dr. J. H. Grisdale has announced an economic survey of the sheep raising industry in Saskatchewan, Alberta and British Columbia this summer. The Agricultural Economics Branch and the Experimental Farms of the Dominion Department of Agriculture, will co-operate in carrying out the survey. This survey, which will include a complete study of conditions in the sheep ranching industry, marks the beginning of a program of research work in agricultural economics on behalf of the Livestock Industry. It is anticipated that between 150 and 200 sheep ranches will be visited in the three provinces. Departmental experts will be assisted by representatives of the respective provincial governments and of Livestock Associations in carrying out work of the survey.

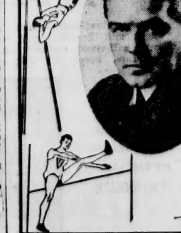

Wire: There's one thing about my mother; she's outspoken.

Husband: Not by anyone I know.

## Empire Games at Hamilton

Hamilton, Ontario, will be the centre next month of the British Empire Games, which athletes from all the Dominions and the Mother Country will flock to.

Mr. E. W. Beatty, chairman and president, Canadian Pacific Railway, is chairman of the national committee of the A.A.U. of Canada for the Games, and promises of support have been received by the committee from Australia, New Zealand, Africa, British Columbia, British Free State, Northern Ireland, while a strong and representative British committee has been formed to ensure full British participation at this notable sports gathering of the British people. Canada will, of course, be very fully represented, practically every province sending its own athletes. The Games are scheduled to be held August 10-23.

## Soil Scientists Are Meeting in Russia

As Tribute To Work Which Has Been Carried On There

People who are still thinking of Soviet Russia in terms of waters and bombs may be called upon to change their views within the next few years and a recent announcement seems to point rather definitely in this direction. This summer the annual convention of the International Society of Soil Scientists will be held in Russia, as a tribute to the soil work which has been carried on there in recent years.

The Russian school of soil scientists has attained a position as a result of its work, which is now being recognized in the world. The holding of this convention in Russia speaks volumes for it is of American origin and our neighbors to the south are not noted for giving credit where credit is not due if it is outside of their own borders.

## Regulate Imports Of Grain

Matter Will Come Up At Imperial Conference

The highly important matter of a board to control imports and schemes for bulk purchase of agricultural commodities will not be overlooked when the Imperial Conference assembles in London, England in the coming autumn. Lord, Hon. J. H. Thomas, Secretary for the Dominion, assured a questioner in the British House of Commons.

These questions, which have been under discussion in British politics for some time, have not been placed on the agenda. Mr. Thomas explained the agenda for the conference was a matter on which agreement must be reached between the governments taking part. He gave assurance the questions would not be discussed without consideration of the agenda.

The questioner probably had in mind the suggestions that a board should be set up to regulate imports of grain.

Part of Plato's philosophy was to the effect that the mind was always superior to the body and should at all times control it.

Mrs. M. Polk, aged 73, of New York, recently made her ninety-second crossing of the Atlantic.

# Pale Western Outworn One Of Worst Pests With Which Farmers Have To Contend

## Will Exhibit At Big Show

Belgium To Take Part In World's Grain Exhibition

According to word received at the headquarters office at Regina, Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference, to be held at Regina from July 25 to August 6, 1932.

Belgium of course became very well known for the part it played during the Great War. It may be interesting, however, to note that Belgium and The Netherlands are two of the smallest, but most densely populated states in Europe. In area they are together not so large as the province of New Brunswick and are but one-tenth the size of Manitoba. The population of each is, however, about equal to the whole of Canada. Belgium also governs the Belgian Congo in Central Africa.

Because of the density of the population in these small countries it becomes necessary to make the very best use of every resource the people have to put rather different efficiency in this direction. This summer the annual convention of the International Society of Soil Scientists will be held in Russia, as a tribute to the soil work which has been carried on there in recent years.

The Russian school of soil scientists has attained a position as a result of its work, which is now being recognized in the world. The holding of this convention in Russia speaks volumes for it is of American origin and our neighbors to the south are not noted for giving credit where credit is not due if it is outside of their own borders.

## Fish Industry

Canada Ships Fish To Almost Every Part Of The World

There are very many corners of the world where Canadian fish in one form or another is not sold.

Last year Canadian fish and fish products found markets virtually all over the world and accounted for nearly \$36,000,000 of the export totals in the Dominion's trade returns.

Canada's exports of fisheries products in 1929 amounted in value to more than nine times the imports.

The exports vary from frozen smelts and canned sardines to canned white meat, but the biggest single item, in point of value, is canned salmon, virtually all of it from the great canning industry of British Columbia. In 1929 nearly 91 million pounds of salmon were canned. Salmon were sold abroad, with the sales representing \$8,866,000 in value. Australia and New Zealand were purchasers to the amount of more than \$2,700,000. Sales to the United Kingdom had a value of \$1,780,000, in round figures, while purchases by France totalled \$1,709,000 and Italy took canned salmon to the value of \$719,000. About 25 or 30 countries were buyers.

## Shortage In Egg Production

Report Shows Extra Grade Is Becoming Quite Scarce

The production of eggs is still declining all over Canada, states the weekly egg and poultry report of the Dominion Department of Agriculture. The market is generally inclined to be firmer, particularly extra, which grade is becoming quite scarce. While there has been no material advance in prices of eggs, as yet, there is a much stronger undertone. At some of the larger consuming centres in the east local receipts of eggs are not sufficient to meet the consumption demand.

New Grievance Against Autos  
Farmers of Scotland have found a new grievance against the automobile. Entries to the fair this year seem to be fewer because, they say, an increasing number of cars make it unsafe to drive their choice livestock along the highways leading to the event. Some sheep owners plan to buy machines to transport their exhibits.

## Mystery Bus Trips A Novelty

Dublin, Irish Free State, has just introduced auto-bus mystery trips as a novelty. Passengers are given a fifty-mile drive every evening during the summer for 60 cents. There is a stop of one hour at popular resorts. The route is not announced before-hand in order to arouse interest.

The pale western outworn one of the worst insect pests with which the farmers of Alberta and Saskatchewan have to contend. Its presence in the field the spring is entirely on the condition of that field during August and early September of the previous season. For this reason, this warning is issued so that farmers in these two provinces may prepare their fields this summer to avoid trouble next spring.

The weather conditions during the early season of 1930 have been such as to practically ensure an enormous increase of the pale western outworn over a large area in both Alberta and Saskatchewan. In fact, it appears now as though these provinces would have the most widespread and devastating outbreak of this insect that has ever occurred.

The outbreak will be most severe in Alberta from Edmonton south to the Lethbridge-Medicine Hat and Medicine Hat and farmers in that area will do well to handle their fields accordingly.

In Saskatchewan the outbreak will probably be quite general from Regina south to the Lethbridge-Medicine Hat and Medicine Hat and farmers in that area will do well to handle their fields accordingly.

Wherever possible, farmers are urged to keep entirely off their fields from the first of August until the middle of September. Summerfallow should be well worked during July so that all weed growth is destroyed and then left untouched. No stock should be allowed to run on the land and no man should be taken across it.

The adult moths of the pale western outworn lay their eggs during August and early September. The eggs are always laid in soft, dusty soil and any fields which have the soil surface slightly crusted will be largely avoided by the moths. In most soils a light rain is sufficient to form this protective crust and if the last of August is a dry day, such a rain the crust that is formed should not be broken in any way.

Fields which are not covered by such a rain the crust that is formed should not be broken in any way. Fields which are not covered by such a rain the crust that is formed should not be broken in any way.

The entire problem during a pale western outworn outbreak can be simply expressed as follows:

1. Any fields in which the soil surface is crusted and undisturbed from the first of August to the middle of September will be free of outworn the following spring.

2. Any fields in which the soil surface crust is broken or disturbed between the first of August and the middle of September, are reasonably sure to be infested with outworn the following spring. If such fields are seeded the crop will probably be destroyed.

The only hope of growing crops successfully over the outbreak area in 1931 (if the foregoing recommendations are not followed depends entirely on the spring rainfall. Wet season during next May and June with frequent heavy rains may result in an amount of damage. When the soil is wet the pale western outworn does not feed so heavily or so long as on dry plants as it does when the soil is dry.

More detailed information can be secured by writing to the Dominion entomological laboratory at Lethbridge, Alberta; Saskatoon, Saskatchewan; Indian Head, Saskatchewan; or to Thebank, Manitoba.

Else: Tell me, mummy, what do you really look like?—Kodakgineer, Strix, Stockholm.

CHAPTER XXI.—Continued

Long after she had read the letter a second time and put it aside, she went to the prospect of a third personal, part of it kept coming back to her, such as: "You say what I should be inarticulate with you, of all people? I've sometimes wondered about that myself. Ask Grandma. Perhaps out of the wisdom of yesterday she can explain that foolish self-consciousness on my part. . . . And lower down: 'Of course I wasn't mad—not even hurt, just a little sore, maybe. I know that deep down inside I didn't think me a Shylack anyhow—' you just didn't understand. . . . So it was the dear old doctor who gave me away. . . . And near the end: 'How's your boarder?' According to Lizzy Baker he's about to settle down with a lady of my acquaintance 'for better, for worse; etc.' only in this case it would be a great deal better than he, or any other man deserves. If this happens to be idle gossip, Charman, please pass the good word along. Yours always, Jim."

"Well," said John Carter, rousing the girl from her reverie, "was it satisfactory?"

"You mean?" questioned Charman as they began to walk.

"I refer to the letter. I was good enough to bring you," he replied.

She laughed happily.

"It was most satisfactory. You took a load off my conscience. I see John, I said something mean and hateful to Jim Bennett before he went away. I didn't intend to be unkind; but I was, terribly. Now it's all right."

"You mean?" questioned Charman as they began to walk.

"I refer to the letter. I was good enough to bring you," he replied.

She laughed happily.

"It was most satisfactory. You took a load off my conscience. I see John, I said something mean and hateful to Jim Bennett before he went away. I didn't intend to be unkind; but I was, terribly. Now it's all right."

"You mean?" questioned Charman as they began to walk.

"I refer to the letter. I was good enough to bring you," he replied.

She laughed happily.

"It was most satisfactory. You took a load off my conscience. I see John, I said something mean and hateful to Jim Bennett before he went away. I didn't intend to be unkind; but I was, terribly. Now it's all right."

"You mean?" questioned Charman as they began to walk.

"I refer to the letter. I was good enough to bring you," he replied.

She laughed happily.

"You mean?" questioned Charman as they began to walk.

"I refer to the letter. I was good enough to bring you," he replied.

straightened out and . . .  
"God's in his heaven!" quoted the doctor as she hesitated.  
"You're a marvelously understanding soul," she answered. "That's exactly the way I feel, only I didn't think to express myself through Browning."  
He smiled, drew up under a lonely tree and stopped the car.  
"Trouble?" asked Charman, thinking of the engine.  
"I hope not," he replied. Then his face grew serious and he turned to her. "Charman," he began, "now that you've digested that letter—got your mind cleared on the subject, in a way, I've something to tell you. Wait till this automobile passes, and, from behind the windshield."  
"Hi, Doc!" he greeted. "One of Luella Moore's twins is took down with appendicitis. Doctor Howe wants you to hurry right along to the doctor's. He's waiting for you there."  
"Thanks," shouted John Carter as he sped on. He turned again to the girl beside him, and added ruefully: "I wish you wouldn't be so inquisitive about my private life. I've waited for no man. It's our confidential conversation that must wait. Do you mind if I drop you at the church? I ought to hurry."

CHAPTER XXII.  
Where's the doctor?" questioned Grandma, who was surprised to see the girl arrive on foot.  
Charman explained, while the old lady uttered an ejaculation.  
"Dear me," she murmured, "and the doctor and Luella have just had word! Lizzy Baker told me the doctor was waiting for you there. You'll bring 'em together again, though it's like as not to drive 'em farther apart, seeing as their next what you'd call a love match. Well, doesn't your letter, didn't you? Did Jimmy tell you what his mother's up to and down to?"

Charman laughed, tossed the old coat on a chair and kissed her grandmother.

"You told me everything. I was silly to get worked up. Grandma, Of course Jim wasn't angry. He wrote as soon as he got my letter. Here's Charman drew the lengthy epistle from her pocket and tossed it into Grandma's lap. "There's nothing in it that you can't see. It's a darning letter."

"You read it out loud, dearie," Grandma murmured, with that fulsome that the girl looked her sunny self again. "There's no hurry about supper. The doctor will be coming at ten. I'll tell you all along that Jim wasn't the boy to be a grade you sit with your feet over the register. Charman, and he and her grandmother was an audience."

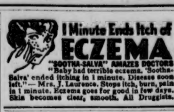

"That sounds most as if Jim was talking, doesn't it?" she commented. "I'll tell you what, I'll tell you again what he says about his mother. She and Sophie always did look as alike as two peas; but that's where the resemblance ends. George K. told me that Sophie (who was born half an hour ahead of Sarah), George was always a little hard on Sarah. Bennett's life. What was it Jim said about them, dearie?"

Charman found the place and read. "I feel as if I had two mothers all of a sudden. It's a weird sensation, coming into a room and not being sure whether you're confronting your mother or your aunt. Looking aside, the resemblance is really startling. till you get used to it. And how they love it! When I feel like that, I have made me wish I had a twin—some one who'd understand the way Mother and Aunt Sophie seem to understand each other. As for this ranch business—"

"He didn't say, did he," broke in Grandma, "whether he's going to the farm for 'em? Seems like those two women were pretty old to start any such a thing. Sarah Bennett married late. I remember a party meeting fifty-six, nor Sophie either."

"Well, naturally," laughed Charman, "I'm considering that they're twins! No, Jim didn't mention that part of it."

"Nor as to what they'd do with the Windward house," went on Grandma, exasperated at this oversight. "Men are terribly unimpassionate about details. I remember a party meeting thirty-odd years ago when there was an awful fight. I was sick with a cold and couldn't go; and will you believe, Edgar Purdie shook his fist in the face of the parish clerk (it was Edgar Bennett's father and as much a little man as ever lived), and went off slanting the door behind him; or

how Mrs. Garfield got so excited she had hysterics right in the vestry and had to be carried out. I never heard of a woman till next day when Lizzy Baker ran over to borrow a yeast cake. I wonder, child, if Jim's coming back to Windward."

"And leave his mother running a fruit ranch?" gasped Charman. "If Jim ever does a thing like that, Grandma, I'll look for the end of the world. It's a wonder Mr. Bennett left me to go to San Francisco that week without her. Oh, dear! how can a woman with a nice son like Jim be such a tyrant?"

"I've been thinking that maybe Sophie will see how the land lies, and give Sarah a good talking. I'm pined Grandma." "Sarah'll take from her what she wouldn't take from any body else, even her own mother. I'm sure she loved him, too. Mrs. Merry was in a minute after Lizzy left. Charman, he said to tell you they'd had a long letter from George, and that the baby'd got another tooth. It does seem strange to think of Maud having a baby, doesn't it? It makes you seem like a well . . ."

"An old maid!" suggested Charman, rising. "You may as well get used to the idea, Grandma. An old maid shocks you who—"

"Shucks!" interrupted Grandma with indignation. "I guess you don't need to be so old maid. I want to! What are you going to tell Jimmy about that idle gossip he's heard talk of?"

Charman laughed, but she flushed also, and answered: "I think I'll forget that question, Grandma. It's some of his business."

"I guess he thinks 'tis," responded Grandma wisely; then with a sudden change of subject. "I wish you'd make milk cake for supper, dearie. Seems as if I'd sort of relish it to-night. And be sure you leave some of the stoves in the morning."

The doctor! he be home late, and most frozen, night like this. Look here, Charman," she added as the girl turned toward the kitchen, "I didn't understand what Jim meant by saying he'd appoint you his secretary in the matter of Towser and Mouser."

"That was merely a bit of sentiment," smiled Charman. "I explain about it later, but now I must hurry with my meal. You'll laugh, Grandma? It's almost dark."

"No, child. I like to sit here some of the time and see the lights come on in the kitchen windows, and watch folks hurrying home to supper. Some of 'em can't make out the way, but I always know they're glad the day's work is done and they're going home. Many's the time I've sat here and watched the shadows of the evening steal across the sky. The vesper hymn says, 'I'm never lonelier this time o' day as some folks are. I guess it makes me feel the way you felt one night when I was just a little thing and I was putting you to bed. Your mother's been in the habit of leaving a light turned on for me outside your door—sort of to keep you company; but that night she was at a church supper and after you said your prayers I sat down on your little bed and repeated the twenty-third psalm."

"I can see you now, looking up at me so soberly and listening to every word like a grown-up. Well, I kissed you, and gave the bedclothes a good airing. I don't know, child, I'll leave the light, same as Mother does; and what do you suppose you'll do? You'll say, just as the hymn says, 'I'm never lonelier this time o' day as some folks are. I guess it makes me feel the way you felt one night when I was just a little thing and I was putting you to bed. Your mother's been in the habit of leaving a light turned on for me outside your door—sort of to keep you company; but that night she was at a church supper and after you said your prayers I sat down on your little bed and repeated the twenty-third psalm."

"I can see you now, looking up at me so soberly and listening to every word like a grown-up. Well, I kissed you, and gave the bedclothes a good airing. I don't know, child, I'll leave the light, same as Mother does; and what do you suppose you'll do? You'll say, just as the hymn says, 'I'm never lonelier this time o' day as some folks are. is my shepherd, I shall not want—a light."

"Grandma!" cried the girl, as she visioned the little Charman of long ago. "You never told me that before."

"Didn't I? Well, I've thought of it enough times, goodness knows. It came into my head the minute you said 'I'll like a lamp. You see, dearie, I'm not afraid of the twilight even though it's a time of memories. The Lord is with me. I shall not want—a light.'"

(To Be Continued.)

## Mystery Of Name Origins

Romance and History Lie Behind Modern Surnames

There's a lot of romance and history in the name-plots for Canadian surnames. Many of them open windows on a vanishing world.

Most people are too busy to think about the names which they have used all their lives. Yet nearly every name in use today has a very long history and a picture of an origin, says an article in "Answers."

In the early days, when Europe was the home, not of nations, but of tribes, there were no surnames. Men embodied in their names the qualities they admired and sought.

Take the name Mr. Baldwin, the Conservative leader, for example. It is very old, and comes from two Teutonic words, *bald*, meaning "bold," and *win*, meaning "friend."

Surnames, properly speaking, were not common in England, even in the fourteenth century. But most men had nicknames. Many of these nicknames are passed on from father to son, and are current today. Thus, Goodfellow, Hogg, Logman, Little, Clark, and so on.

A queer instance of such a surname may be found in the Nottingham Borough Record. It is "Overand," the name of the first Overandover was long-winded!

Surnames proper came in when the population increased to such an extent that it was necessary to obviate confusion. Trades, crafts, locations, and eccentricities very often determined the name.

The queer surnames sometimes given to foundlings can be ascribed to this source—a childish head, speaking the first name that comes to his empty head, or a Mr. Bumble, following an alphabetical system and perceiving a surname to suit the foibles of each little victim. It was in this way that Oliver Twist received his immortal name.

Ice Hockey In August

Entertainment For Delegates To British Medical Association Convention

Summertime in Winnipeg will be transformed into a rigid winter by the cold lineups for the hundreds of distinguished medical men who will gather there from all parts of the world for the British Medical Association convention. Ice will be laid in the amphitheatre rink for the week August 24-30 in order that the Winnipeg Skating Club and its picked teams of local star material, may give fans skating and hockey excitement.

An Indian patient has also been arranged for entertainment of the kind. Some Tenon and Assiniboine Indians will perform in horse racing and trick riding. As a mark of honor, shared by H.H.H. Prince of Wales, Lord Dawson of Penn, physician to His Majesty King George, will be inducted as a Cree chief.

The Oil Of The People—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thomas' has benefited by it and would use no other preparation.

A Clever Idea

Angerous swindlers seem to be without number. A new fountain pen swindle was exposed in London. Pens priced about \$2, but worth 30 cents, were marketed to persons whose purses had just been printed in the newspapers. In most cases the executives of the estates thought the dead swindler had ordered the pen and paid without comment.

Would Help Farmers

The Agricultural Council points out that the cup of coffee given to every regular army man each morning has to be imported and suggests instead that the army drink milk for breakfast, thus increasing farm income.

The man who won a big pool in a horse race had left his name to the papers. The papers aren't big enough to publish the names of all the losers.

Turkey expects bounteous crops this year.

## WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Pickle, Sask., writes: "Ten years ago my husband and I were very ill with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses was completely relieved. Since then we have never been without a bottle of the balm."

On the market for the past 85 years; put only by The T. Millburn Co., Ltd., Toronto, Ont.

## Canadian Goods In British Daily Life

Always Something To Remind People Of Dominion's Products

"What the future holds for Canadian products in the United Kingdom can be judged in the light of today," said Douglas S. Cole, I.R.C., Canadian Trade Commissioner, at Bristol, England, in an interview at Toronto.

The modern Englishman can rise in the morning from a Canadian-made bed on a Canadian carpet, rather himself with a Canadian shaving brush and Canadian shaving cream, and drive his car on Canadian-made tires.

Canadian eggs, and toast made from Canadian flour, all cooked on a Canadian gas or electric range, and kept wholesome in a Canadian refrigerator, while he reads a newspaper printed on Canadian paper. He can drive in a Canadian car to an office and dictate letters on Canadian paper, which he signs with a Canadian fountain pen. He reduces his weight on a Canadian massage roller, plays racquet on Canadian rubber shoes, tries to look graceful on Canadian cushions, and drives his doctor to starvation with Canadian apples.

Most Cures Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the chest were being crushed. Dr. K. J. Kellogg's Asthma Balm brings the user to perfect health. The passages of the lungs and normal breathing is firmly established. Hundreds of testimonials received annually prove its effectiveness.

Machine Matches Colors

Newest Invention Will Be More Exact Than Skilled Matchers

In France, wire-lensed sp. wince, test their tongues to tell whether the fluid is found for a plebian carafe or a gentleman's collar. Were it not for whiskey-tasters England's famed brewers would be unable to produce a uniformly good product year in, and year out. On equally skilled men depend the fact that all vermillion dyes are uniform, that all satins are pure. But folios of the color industry for the hundred of distinguished men who will gather there from all parts of the world for the British Medical Association convention. Ice will be laid in the amphitheatre rink for the week August 24-30 in order that the Winnipeg Skating Club and its picked teams of local star material, may give fans skating and hockey excitement.

An Indian patient has also been arranged for entertainment of the kind. Some Tenon and Assiniboine Indians will perform in horse racing and trick riding. As a mark of honor, shared by H.H.H. Prince of Wales, Lord Dawson of Penn, physician to His Majesty King George, will be inducted as a Cree chief.

The Oil Of The People—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thomas' has benefited by it and would use no other preparation.

## Little Helps For This Week

"Master, what shall I do to inherit eternal life?"—Luke x. 25.

I do not ask that Thou wilt bless children, one they will take it with. So much as that Thy hands may dress the borders of my lowly way. With content deeds of good and right.

Good deeds will shine as the stars in heaven.—Thomas Chalmers.

Good deeds are very fruitful; out of one good action of yours the Lord produces a thousand, the harvest whereof is perpetual.—Bishop Hall.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it with out objection. When directions are followed, the medicine will be most delicate child, as there is nothing or no unpleasant taste in the composition. They will speedily rid a child of worms and restore the health of the system, and prevent the child from becoming impaired by the attacks of these internal pests.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Rockefeller Foundation has decided to give \$400,000 to the University of Sydney, Australia, for medical research.

The Irish Free State, like Great Britain, gave the European union idea cool treatment in a note replying to Foreign Minister Briens's questionnaire.

British Columbia's lumber industry is holding its export markets better than Washington and Oregon, according to H. R. MacMillan, leading exporter.

The Canadian Bank of Commerce shipped \$1,000,000 in gold to Canada, from New York, the first important shipment of the yellow metal across the border since 1927.

Value of building permits issued in 61 Canadian cities during June was \$17,006,178, according to a report issued by the Dominion Bureau of Statistics.

"Pure invention," was how Sir Godfrey Thomas, patent secretary to the Prince of Wales, described a story that the Prince plans a United States visit and Canadian "camping holiday" this year.

Seven thousand specimens of poultry from 23 countries, including Canada and the United States, went on exhibit in the Crystal Palace, London, England, for the Society's Poultry Show.

To commemorate the action of the 700 Indians who decided to the British crown all land extending west to York, a cairn will be erected at Carrying Place, Prince Edward County, Ontario. A 25-foot plot at the main corner of the plot has been chosen as the most suitable location.

The death occurred of James M. Coleman at his residence, 505 Oliver Avenue, Montreal. Mr. Coleman was a well-known figure in railway circles and was the inventor of the "max" locking device, which prevents passenger cars from telescoping in a railway collision. He was in his 70th year.

Anxious To Capture  
Market In Canada

Australia Makes First Shipment Of Oranges For Distribution

The first shipment of Australian oranges to enter Vancouver, 5,000 cases from Sydney, N.S.W., was unloaded recently for distribution at various points throughout the Dominion.

To capture the Canadian market for Australian orange growers is the aim of the wholesale fruit distributors organization of Sydney, which two months ago sent W. H. Pierce here to pave the way for the drive.

Claiming that the Australian fruit surpasses the best from the United States, the fruit growers of New South Wales believe that their product will quickly win a large share of the market that the United States produces now enjoy.

## Banded Bird Law

Co-Operation With Proper Authorities Is Required

It is important that any person who finds a banded bird report the fact to the National Parks of Canada Branch, Department of the Interior, Ottawa, giving the species of the bird, band number, date and locality of occurrence, and information as to whether the bird was found dead, was killed, or was released alive still wearing its band. Persons reporting banded birds will be informed promptly respecting the place and time of banding.

Scotsman: "How much to press a pair of trousers?"

Agent: "One shilling."

Scotsman: "Then press one leg for six-pence—I am having my photograph taken side view."

She: "And don't you ever forget that I throw over a millionaire's son just to marry you."

Her: "Yes that guy was not only born rich but lucky as well."

"Have you heard of the new medicine that's put in coffee and takes away all liking for whiskey?"

"Heaven! I'll never dare drink coffee again!"—Karlström, Oslo.

Novel Attempt To  
Escape From Prison

Robber Serving Sentence In Sing Sing Seized Up In Mattress

A novel method of attempting escape from Sing Sing prison was uncovered when guards found Jack Levy within a mattress made in the prison factory. Levy, small and middle-aged robber, almost got away with it. He would now be on his way to freedom but for the curiosity of Victor Brown, keeper-chauffeur, who thought a pile of mattresses on his truck looked suspiciously job-loaded although it had been twice inspected by other guards.

Brown summoned Principal Keeper Sheehy and a search was instituted. Sheehy ripped open one mattress and discovered Levy. Levy had a razor with which to cut his way out, and a hammer. The robber will be sent to Clinton prison, Dannemora, N.Y. His attempted escape will put back his earliest possible date of release to 1932. Levy was sewed into the mattress from the outside. His accomplice has not been found.

## Tuning Out Noise

Idea Of Scientist, If Carried Out, Would Be Boon To World

A person is in an office that looks out on a busy street, and traffic is roaring past mink normal speech inaudible. He touches a switch and the noise fades away to nothing. The traffic is still streaming past, but one cannot hear a sound. That is the promise of a well-known scientist, Dr. James Robinson. Dr. Robinson's idea is that sound waves might be "tuned out" in the same way as we get rid of unwanted broadcasting stations on our wireless set. Special apparatus built into the walls of a building will "tune" the sound waves and in this way we really shall get silence. Every day the mechanical noise in which we live gets noisier and noisier.

## CHARMING YOUNG PRINCE

Photograph Shows Crown Prince Michael, of Roumania, who was recently relieved of the cares of king when his father, Prince Carol, returned and took over the throne he renounced, with his faithful dog.

Patrol Northern Highway

Mounted Policemen To Watch Traffic On Prince Albert National Park Road

Mounted Police in Saskatchewan assumed a new role when a member of the scarlet coated force heads northward from Prince Albert recently on a brand new motorcycle to inaugurate the system of patrols on the Prince Albert National Park highway. Speedsters will have to watch their time in the future, for if they exceed thirty miles an hour the motorcycle may get them and then a fine up to the maximum of \$100 awaits the offenders on conviction.

Other regulations to be enforced require motorists to keep on the right of an imaginary line down the centre of the highway, to make sure his vision to the rear and to each side is not obstructed and not to catch up and pass another vehicle at a blind curve.

Heavily loaded trucks with loads protruding beyond the sides of the vehicle will be required to pull well out to the side and stop if necessary to permit an approaching vehicle to pass. There are no set hours for the patrol, but it will be maintained throughout the day, and at times when traffic is particularly heavy. The mounted policeman on stride his motorcycle will be seen at night slipping along the highway to check up on reckless drivers.

## Recipes For This Week

(By Betty Barclay)

## PEANUT BUTTERED APPLES

Six large tart apples; one-fourth teaspoon salt; three-fourths cup peanut butter; and four tablespoons lemon juice are required. Spread thinly sliced apples over the bottom of a baking dish. Sprinkle with salt, place a layer of peanut butter on top, and repeat until all the apples and butter are used. Four lemon juice over top layer of apples before adding the last layer of butter. Bake in a slow oven at 325 degrees for one hour.

## PINEAPPLE ORANGE SPONGE

1 package orange flavored gelatin.  
1 cup boiling water.  
1 cup pineapple juice and cold water.  
1 cup shredded pineapple, drained.  
Dissolve gelatin in boiling water. Add pineapple juice and cold water. Cool. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in pineapple. Turn into molds. Chill until firm. Unmold. Serves 8.

## Wit and Philosophy

Puns are not always properly attributed to their original author—possibly because puns have been condemned as the lowest form of wit. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in pineapple. Turn into molds. Chill until firm. Unmold. Serves 8.

The Modern Maid

In answer to the advertisement of a Weymouth, England, boarding house keeper for a housekeeper, a girl demanded a salary of \$225 a year, every Sunday and three evenings a week off, and a garage for her motorcycle.

## Ramsay MacDonald and Peace

Says Peace Is the Greatest Cause Before the World Today

Belief that peace is the greatest cause before the world today was expressed by Prime Minister MacDonald at the concluding sessions of the Inter-Parliamentary Union Conference in the gallery of the House of Lords.

"Until we come into personal contact until we have looked each other in the eyes, until we have sat down side by side at a common meal, until we have discussed our national literature, science and arts, we will never be the type of citizen who understands others and has no suspicion in his heart about them," said the Prime Minister, pleading for effective international disarmament.

Mr. MacDonald expressed keenest pleasure at the action of the United States Senate in ratifying the London naval treaty, adding "If we are going to have disarmament, it can only be effected by international agreement, in carrying disarmament stage after stage until the job is finished, and very often, in the course of it, there will be disappointments."

There's a Reason

John Big Soldier, 64-year-old Indian whose people at Black River Falls, Wisconsin, depend largely on the blueberry crop to bring them a living, may be able to explain better than your favorite restaurant proprietor why the latter is not serving too many blueberry pies. "Heap damn big frost," John said.

It's easy to tell if it's a friend or a bill collector at the door just wait a while and if it's a bill collector he won't go away.

It's the measure of the human soul.

Expands its best, its noblest effort makes the man and makes him whole.

SUNDAY SCHOOL LESSON  
AUGUST 3

NAOMI AND RUTH

Golden Text: "And He made of every nation of men to dwell on all the face of the earth."—Acts 17: 26.

Lesson: The Book of Ruth. Devotional Reading: Isaiah 61: 1-7.

## Explanations and Comments

The Beginning Of the story, 1: 13.—On the days of the Judges there was a famine in the land of Canaan, and the Bethlehemites, Elimelech, and his wife Naomi, and their two sons, left their home and settled in Moab across the Jordan. The Jews have a legend to the effect that Elimelech was of a princely house, a descendant of Amminadab, the father-in-law of Aaron, that he was wealthy, and left the country in the time of famine in order to preserve his wealth intact, for his starving brethren.

In Moab the two sons married daughters of that alien land, Ruth and Orpah. Ten years passed, father and sons found their beds there, and Naomi, now poor, whatever she had been in Bethlehem, determined to return to her native land. Farewells seldom take place in the east in eastern lands, and Ruth and Orpah carried out the usual custom when they were accompanied by a short distance on her way. When they thought they had said enough to show her fitting respect, she stopped to dismiss them. With a kiss they turned back to return to their homes and let her go on.

Ruth's Great Decision, verses 14-18.—Naomi, who had been determined to return by her mother-in-law, she kissed her and returned as Naomi had desired. Naomi, however, was not to Naomi. With all her power Naomi sought to dissuade Ruth from accompanying her. "Behold," she said, "thy sister-in-law is gone, and she has her people, and unto her go (Chemoth): return thou after thy sisters-in-law." In answer, Ruth uttered those beautiful words which have been treasured following after her. "Entreat me not to leave thee, and to return from following after thee: for whither thou goest I will go; and whither thou lodgest, I will lodge; thy people shall be my people, and thy God my God." The ancient belief was that such people had their own god, and that in going to another land must necessarily serve the god of that land; compare 1 Samuel 26.

Ruth was a Moabitess, of an accursed race, who according to the law of Moses was not allowed to enter the congregation of the covenant. The Jews finally teaches that no such disability remains when one is in the covenant, and does not forget the difficulty as it existed for Ruth: how the people would be likely to look at her, how she herself, as she came into contact with the religion of the Hebrew people, would realize the greatness of her distance. Again it was nothing calculated to allure her from the standpoint of material prosperity. Thus she was known of the people of Jehovah had been compelled to leave their land on account of famine. From them she knew of the perils of those who had remained in the land, and all the sadness of their condition. She came back with Naomi into poverty, and to people who in all probability were hostile to them both.—G. Campbell Morgan.

"Large is the life that flows from Christ's makes. Expands its best, its noblest effort makes the man and makes him whole."

It's the measure of the human soul.

Expands its best, its noblest effort makes the man and makes him whole.

It's the measure of the human soul.

Expands its best, its noblest effort makes the man and makes him whole.

Expands its best, its noblest effort makes the man and makes him whole.

It's the measure of the human soul.

Captain Sherlock Has  
Newest Air Record

Flies Mail Plane 1,500 Miles in One Day Making New World Record

Recent achievements in the air are just part of the day's work in the north country. The newest feat, that of day he flew the mail from Port McMurray, in northern Alberta, to Akivik, on the topmost rim of Canada—about 1,500 miles—making five delivery stops en route.

Son of Sir Francis and Lady Sherlock, Irton Hall, Cumberland, England, Captain Sherlock is a former member of the Royal Air Force. He has seen war and peace-time service in France, India, Egypt and Mesopotamia. Before joining the Commercial Aircraft, he was a member of the flying staff of Dominion Explorers.

On the morning of June 26, at 4:45 o'clock, Captain Sherlock took off from Port McMurray air base, flying a Bellanca Pacesetter. Less than 21 hours later, at 2:55 o'clock the next morning, with the midnight sun casting its twilight glow, he landed the mail at Akivik, within the Arctic circle. On his way, he made four night flights, and he landed at Port Simpson, Port Norman, Port McPherson and Arctic Red River along the rushing Mackenzie River. Captain Sherlock's flight—just one of the records set up by fearless airmen speeding to and fro across the barrens of the north—was the first one-night flight from Alberta to Akivik.

## When Aviators Trespass

Judge Rules People Own Air Five Feet From Ground

Aviators must fly at least 500 feet high to avoid trespassing on property over which they pass. Federal Judge George P. Hahn, of Cleveland, Ohio, ruled in a precedent setting decision.

The decision was on a bill of indictment brought a year ago by two suburban property holders against the Curtiss Air Corp., of Dayton, Ohio, and the Curtiss Flying Service.

The complaint cited the ancient Roman legal principle, "Whoever controls land controls it from the centre of the earth to the zenith," and sought an order forbidding planes to pass over the property.

Judge Hahn ruled that the "effective possession" of such property extends only 500 feet up.

## On Arbitration Board

Appointment has been announced of the Rt. Hon. Justice Duff, of the Supreme Court of Canada, to act as Canadian representative on the arbitration board in connection with the "Tm Alone" proceedings. Mr. Justice Duff succeeds to the position made vacant by the death of the late Eugene Lafleur, K.C.

In acid soil, hydrangeas bear blue flowers, whereas in neutral soil they bear the "normal" pink blossoms.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

## THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is so light and easy to handle, it will withstand extreme changes in temperature, keeps out cold and wet, but glass.

It allows the full sunlight to enter, including the health-giving Ultra-Violet rays which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNES SUNROOMS ETC.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

## AIRWAY PLANS FROM HUDSON BAY TO BRITAIN

Vancouver, B.C.—Imperial Airways spanning the Northern Atlantic Ocean and Hudson Bay may one day connect Canada with the other aerial routes of the British Empire, declared Major-General J. H. Macdonald, addressing the Canadian club here.

President of the Aviation League of Canada, he told how plans are now being laid for a trial flight across the northern route via Hudson Bay to Europe in 1931. Gasoline for this trip is now, through the courtesy of the Hudson Bay Company, being placed along the route.

At the same time, General Macdonald predicted that valuable as this connection will be to the Imperial scheme of things, a great portion of the air traffic between the United States and Europe may have to traverse the same route.

Plans for the linking of the British Empire were first laid at the Imperial conferences of 1920 and 1922, he explained. As a result of these, the British-India route had been established and with it a feeder line running from Cairo across Africa.

On this feeder line, as he called it, the gold of South Africa is also being taken. The route was put into circulation weeks before it would otherwise reach great centres of population. "This meant the saving of much in interest."

The speaker also pictured the flight of the R-100, which will soon take off for the first time, as forging another link in the aerial chain around the British Empire.

"Canada's geographical position," the general said, "is a most fortunate one—we can control these routes that pass over our territory, and we must control them. We have Canadian operated services."

## Second Reading Given Naval Treaty Bill

No Division in British House of Commons, London, England.—The bill suspending the London naval treaty giving effect to the naval reduction conference recently passed at the second reading in the House of Commons without a division.

Parliamentary Secretary G. G. Ammon explained that under the British legal system a treaty, although it might be binding and have effect on the British Government, could not be enforced in law courts against private individuals unless supporting legislation was passed.

Under the Washington treaty Britain entered into certain agreements not to build or to permit private shipbuilding certain vessels of war. The London treaty contained alterations of these agreements. To give effect to them, the Commons was asked to approve the bill.

## Compelled To Cancel Official Engagement

Weather Conditions Forced Prince To Abandon Airplane Trip, London, England.—For the first time on record the Prince of Wales was forced to cancel an official engagement because of weather conditions.

Weather reports from Wales indicated flying conditions were impossible and the Prince cancelled an aeroplane flight which he had intended making from London to Carnarvon to open the Royal Welsh Agricultural Show. As it was impossible to reach Carnarvon from London by train in time for the show, the Prince's engagement was abandoned.

## Raps Border Patrol Bill

International Police Force, Denouncing the proposed border patrol bill before Congress as comparable to "barbed wire fences between Canada and the United States." Congressman William Pittenger, Duluth, was the principal speaker at the Border Patrol Association's annual meeting here.

## No Passengers Killed

Ottawa, Ont.—Railway accidents in Canada during May took a toll of 41 lives and resulted in injuries to 283 persons. It was shown in a report issued by the Board of Railway Commissioners. None of those killed were passengers on trains. Accidents on railway crossings resulted in 15 persons killed and 38 injured.

Fodders of Cuba are offering sheep wars on the settlement plan.

W. N. U. 1848

## Aviation Pioneer Dead

Glenn H. Curtiss Did Not Lose Path When Others Discouraged

Buffalo, N.Y.—Glenn H. Curtiss, who was an aviation pioneer, died in the General Hospital here.

Mr. Curtiss was brought to the hospital from his home at Hammondsport, N.Y., to undergo an operation for appendicitis. The operation was said to have been successful and he was reported recovering rapidly.

Mrs. Curtiss came here with her husband and has been almost constantly at his bedside.

Hospital authorities stated death was due to pulmonary embolism, caused by a blood clot on one of the main arteries leading out of the heart.

Glenn H. Curtiss nurtured the young science of aviation in the middle years of its development, when fainter hearts had grown discouraged.

With a tomato can for a car-buretor, he built his first motor bicycle in the United States. He continued to experiment with light-weight motors and evolved his famous V-type motor, a departure in design reflected in the modern racing engines of today.

In 1904 he set a motor bicycle speed record at Ormond Beach, Fla., of 30 miles an hour in 54 seconds, and in 1906, over the same course, travelled faster than man ever had before, a mile in 26.5 seconds.

His fame spread and drew the attention of the late Major Thomas Scott Baldwin, builder and operator of balloons. In 1904 the two men met in Hammondsport and installed a Curtiss motor in Baldwin's balloon. With this machine they made a circular flight of Oakland, Cal., in August, 1904, first by the way.

Dr. Curtiss, Graham Bell, inventor of the telephone, commissioned Curtiss to build a motor for a submarine.

Glenn H. Curtiss was experimented with for a time, and then he turned their attention to power aeroplanes.

## Floods In England

Two Lives Lost In Consequence Of Cloudburst In Yorkshire

Whitby, Yorkshire, England.—Two lives are already known to have been lost, and other fatalities are feared, in consequence of a flood that followed a cloudburst in the valley of the Esk River.

The last connection with the village of Maltby, in the centre of the flooded area, was cut late today when the telephone wires broke down.

Many families throughout the area are imprisoned in the upper floors of their houses.

The train service has been discontinued over a wide area.

Spectacular rescues were effected by the life-saving crews, who were particularly effective in the waters of the town of Whitby.

From one house a woman and four children, who had climbed to the roof, were hauled through the flood to safety by means of a breeches buoy brought into play by the coastguard.

From another house five people were rescued by the coastguards with life-saving appliances at a time when the water had already reached the bedroom windows.

Twelve people were rescued from the upper story of a mill.

The town crew of Whitby patrolled the streets and warned the populace that the water supply would last for only 48 hours. The pipes from the reservoir had been burst.

## Hoover Signs Naval Treaty

To Limit Fighting Vessels For Three Great Powers

Washington, D.C.—In the historic White House ceremony, President Hoover signed the London Naval Treaty.

Ratification by Great Britain and Japan and the depositing of all three signatures in London remain to be accomplished to bring into full effect the covenant limiting for the first time all categories of fighting vessels for the three great naval powers.

## No Reduction In Pay

Ottawa, Ont.—Department of railways and canals in a statement recently declared that men working on the Welland Canal were not reduced in pay as a result of the application of the eight-hour day and 44-hour week. All men on the statement said will receive the same weekly wage as they did before parliament passed the legislation at the last session.

## Small Fire In Orphanage

Winnipeg, P.C.—The young inmates of St. Joseph's Orphanage here, marched out in orderly fashion and were unharmed when fire attacked the institution. Starting in a cupboard, the blaze quickly spread to the dormitory roof but quick arrival of firemen prevented extensive damage.

## Scores Drowned At Coblentz

Pontoon Bridge Collapsed Under Strain Of Heavy Traffic

Coblentz, Germany.—Scores of persons were drowned when a collapse of a pontoon bridge here during celebration of the evacuation of the Rhine-land in which President Von Hindenburg had taken part. About 100 people were on the bridge when it crumbled.

An enormous crowd had gathered along the banks of the Rhine during the evening at the so-called "Dutchen Pok" where the Moselle River joins the Rhine.

They stood watching the display of fireworks and the illumination of the ancient castle of Ehrenbreitstein in honor of President Von Hindenburg's visit.

When the display was over, thousands of people tramped across the pontoon bridge, which leads to a Radio Broadcasting Co. of New Zealand, who spent the past two weeks studying conditions in Canada.

Suddenly, while about 100 persons were on the bridge, it collapsed under the strain of the unusual traffic.

Many were killed by falling timbers, and others were swept away in the black, swirling water.

Rescuers immediately launched boats, but many of the victims could not be located.

## ADMINISTRATION OF PEACE RIVER BLOCK BY B. C.

Victoria, B.C.—British Columbia has been administering the administration of the Peace River block and the railway belt on August 1, under tentative plans announced by the government.

Efforts are being made now to adjust the necessary administrative details by that date.

The actual transfer will be accomplished without the disturbance of existing administrative machinery. For the time being, federal officials will carry on. As soon as possible, however, the administration will be entirely overhauled to eliminate the present duplication by federal and provincial officials, particularly in the railway belt, where two sets of machinery have operated side by side for years.

In some offices the provincial officials will be able to carry on alone, possibly with the aid of one or two from federal territory. In the forestry department, however, it may be necessary for forest patrol in the large areas to be transferred.

## A Generous Gift

American Philanthropist Offers Ten Million Dollars For Educational Work In Britain

London, England.—The Daily Herald, signed "The Phantom Rider" received by several Fletcher Park ranchers was added to the uneasiness spread by the recent appearance of a masked horseman who rides the rugged Laramie peaks on a snow-white horse.

Five men and a woman are reported to have received the letter, which were placed in the hands of officers seeking the "Phantom Rider" who recently rode into the yard of Charles Adams, 29, and shot the rancher through the shoulder.

Peases searched the hills following the attack but were unable to apprehend the mysterious horseman who is believed connected with recent cases of cattle rustling.

## Children Faint At Service

Madrid, Spain.—More than 2,000 children fainted at a Communion Service here. They had risen early and fasted for the ceremony. When the hot sun came out girls and boys alike dropped unconscious. A staff of 80 nurses in attendance were inadequate to care for the sick. A total of 30,000 children were present.

## Leaders Meet

Rudyard Kipling and T. B. Macaulay, president of the Sun Life Assurance Company of Canada, leaders in literature and finance, aboard the Canadian Pacific liner "Duchess of Bedford" on their arrival in England.

## VISITOR FROM ANTIPODES

A. R. Harris, general manager of the Radio Broadcasting Co. of New Zealand, who spent the past two weeks studying conditions in Canada.

## Air Tragedy Told

Aviator Makes Heroic Attempt To Save Life Of Youthful Passenger

Edmonton, Alberta.—A story of terror storm and of a heroic battle by Dale Atkinson, Western Canadian, who was flying over the mountains of Lake Niska, Northern Saskatchewan, to save the life of his passenger, was told with the arrival of the body of the passenger, Woodrow "Chick" Eagle, 17, son of the Rev. Mr. Atkinson, brought from the north by aeroplane.

Atkinson came out with the body in an aeroplane piloted by W. E. Gilmer.

Eagle died when Atkinson, running into a terrific windstorm which had attained the proportions of a typhoon, swung about, raced to Lake Niska, landed and was pushing to shore. A cross gust of wind lifted one wing of the machine high in the air, toppled the aeroplane over on its back, and threw the occupants into the turbulent waters, which had been swept into fury by the storm.

Atkinson smashed his way into the cabin of the machine, found that his passenger was not there and after a long search in an effort to find him.

Near exhaustion, Atkinson gave up the uneven battle and swam the dozen yards to shore.

The fatality occurred on July 15, and the pilot waited until the water gave up the body, July 18.

## Terrified By Masked Rider

People In Hills Of Wyoming Receive Threatening Letters

Wheatlands, Wyo.—Death threats signed "The Phantom Rider" received by several Fletcher Park ranchers was added to the uneasiness spread by the recent appearance of a masked horseman who rides the rugged Laramie peaks on a snow-white horse.

Five men and a woman are reported to have received the letter, which were placed in the hands of officers seeking the "Phantom Rider" who recently rode into the yard of Charles Adams, 29, and shot the rancher through the shoulder.

Peases searched the hills following the attack but were unable to apprehend the mysterious horseman who is believed connected with recent cases of cattle rustling.

## Beatty Issues Statement

Detailed Information On Air Service To Be Announced Later

Montreal.—In reference to the newspaper reports with respect to possible aviation developments in Canada, Mr. E. W. Beatty, chairman and president of the Canadian Pacific Air Lines Company, made the following statement:

"By amendments to its charter secured in 1919, the Canadian Pacific Railway Company was empowered to establish and operate services of aircraft of all kinds, and in recent years it has, through its express department, entered into contracts for express services with established Canadian air service companies. Discussions have taken place between the president of the Canadian National Railways and this company looking to participation by both companies in the ownership of airway companies, both in eastern and western Canada, and these discussions have proceeded to the point where an agreement in principle has been reached."

"It is anticipated that each of the transcontinental railways will have an equal interest, and when negotiations have been concluded an announcement in greater detail will, no doubt, be made."

## Seeking New Trade Treaty With Canada

New Zealand Official Coming To Ottawa To Discuss Matter

Washington, N.Z.—With the view of negotiating a new trade treaty between New Zealand and Canada, Dr. Craig, controller of customs, will be in Ottawa to discuss the matter with the Canadian authorities.

On August 12 for Ottawa to open discussions with the Canadian authorities and carry matters as far as possible toward the opening of the Imperial Conference in London, England.

Dr. Craig will subsequently go to London to assist in the Imperial Conference discussions on tariff and allied economic questions.

## TRAIL OF DEATH FOLLOWS 'QUAKE IN SOUTH ITALY

Naples.—Amid the vine-clad hills of the Apennines the simple peasant life of the Italian hills has been reduced to the number of 679 in half a score of towns tumbled to ruins by a series of terrific earthquakes.

Government estimates placed the injured at more than a thousand, and the number of deaths at 1,000. The towns hit the hardest are off the coast, but the worst of the damage was done by the inland towns.

Several supply trains have been sent to points on the railroads in the interior from Naples, and hundreds of relief workers were penetrating the recesses of the agricultural area, offering relief to the still terror-stricken victims.

The quake stunned all Italy. It was the worst earthquake since Messina was hit but obliterated in 1808. The first shock came an hour after midnight. Its own awful nature was supplemented by a tremendous electrical storm over virtually the whole of Italy.

The shaken area extended from the Tyrrhenian sea to the Adriatic, the coast settlements suffered less in proportion than the mountain populations. Naples experienced several hours of panic with several houses and scores of casualties. Among this city's victims was the Countess De Rossi Vargas. Never in Neapolitan history had this classic city experienced such stark-mad right. A frenzied populace raged through the streets angrily heading nowhere.

Wrecked bridges, snapped columns and many other obstacles had been the upshot of the relief workers by the upheaval of nature. Motor cars made little progress over unaccustomed routes.

The highways of the area are notoriously undeveloped and rail lines passed through many gorges in which the quake had tumbled avalanches.

Inverted tunnels upon the road to Meti, where 180 persons perished, according to official figures, fell in and blocked service beyond restoration for many days.

## BRITAIN MUST ADOPT BETTER TRADE METHODS

London, England.—British methods of selling in Canada are severely criticized in the report of P. W. Fields, senior British trade commissioner in Canada, which has been made public by the department of overseas trade.

Mr. Fields attacks "long distance" selling methods, the under payment of agents and the failure of British manufacturers to adapt themselves to the changing conditions in the Canadian markets.

The criticism is endorsed by the Financial Times, which says: "The plain fact of the matter seems to be that the British have neglected to cultivate the Canadian market by the adoption of efficient methods of selling and have allowed their American rivals to jump their claim."

It is no longer possible to sell goods by correspondence, which is often done in Canada, and when negotiators have been concluded an announcement in greater detail will, no doubt, be made."

"The Dominion has already done as much as she can reasonably be expected to do in giving British goods a preference which is estimated to mean a trade of £40,000,000 to British importers of £40,000,000 in trade and naturally Canadians are anxious to see to it that they get their share of this trade."

"The Dominion has already done as much as she can reasonably be expected to do in giving British goods a preference which is estimated to mean a trade of £40,000,000 to British importers of £40,000,000 in trade and naturally Canadians are anxious to see to it that they get their share of this trade."

"The Dominion has already done as much as she can reasonably be expected to do in giving British goods a preference which is estimated to mean a trade of £40,000,000 to British importers of £40,000,000 in trade and naturally Canadians are anxious to see to it that they get their share of this trade."

## Manitoba Appointments

Officials Named To Take Over Duties In Natural Resources Department

Winnipeg, Man.—The Manitoba Natural Resources Department has announced the following appointments to take over duties in its new department of Natural Resources. They were made necessary through the taking over of the resources from the Dominion. All seven appointments were formerly employed by the Canadian Government.

They are:

Col. H. J. Stevenson, provincial secretary, the forestry branch; L. P. O. Noel, assistant director of provincial lands; John Tod, timber sales officer; W. B. McLeish, mining recorder, to be stationed at The Pas; Man; A. J. McLaren, mining inspector and engineer, to officiate as recorder of mines at the new branch, to be stationed at Seven Sisters; E. B. Hogarth, engineer of water power branch, to be stationed at Slave Falls; The geological department will have a personnel of approximately 135 when the staffs are complete, it was stated. Appointments to the fisheries branch are now being considered.

## U.S. Increases Population

Expected New Census To Show Population Of About 122,957,000

Washington, D.C.—A total of about 122,957,000 people—just a few thousand under 123,000,000—probably will be the population of the United States for 1930, when the final count is announced here by Director W. M. Stewart of the census.

The 1929 population was 105,710,620. Should final figures bear out the calculation, the country would show a growth of 17,246,000 people in the ten years.

This approximate total figure has been calculated by the Associated Press on the basis of actual preliminary returns from 40 states and the District of Columbia.

## Offered Life Membership

Services Of Political Leaders Is Recognized By Canadian Legion

Ottawa, Ont.—Dominion honorary life membership in the Canadian Legion is being offered to the Hon. W. L. Mackenzie King and the Hon. R. B. Bennett, Sir William Clark, high commissioner for Great Britain, and the Hon. Jean Knight, until recently the minister of Finance in Canada, in recognition of their outstanding services in the interests of the returned soldier body and to the legion. The first occasion of Dominion honorary life membership was awarded since the inception of the legion, is announced by Lt.-Col. L. L. Lefebvre, president of the Legion.

## Celebrate Potato Day

Winnipeg, Man.—The city is to have a "Potato Day" celebrated on August 12. A parade of potato plants will visit potato plantations, speeches will be made, and housewives invited to cooperate in stimulating the growth of potatoes in the province. This is being done under the auspices of the Agricultural Bureau of the Board of Trade.

## CHAMPION CHATTER

VOL. 3

Thursday, July 31, 1936

No. 32

Published in the interests of the People of Champion and Farmers of this vicinity.  
**GEO. L. DEPUÉ, Editor.**

In ancient times they used to cast a notorious woman in a lion's den. Now they cast her in a movie.

There is one sure thing about the new Canadian government. They made it good and hot for us for a couple of days this week and didn't help the price of wheat one bit yet.

"My dear," exclaimed the husband when he arrived home late and found his wife waiting for him, "you'd never guess where I've been tonight." "Oh, yes I can," said the wife, "be on your way with your story."

Roy Taylor reports the arrival of a new son and babe doing nicely. Why are there so many divorces?

"Good Equipment Makes a Good Farmer Better."

Prof: So many people are getting married now!

Johnny Anderson says that the new Mc-Dug duplex weeder is sure a weed getter and that it doesn't take long to get over some ground with it, either.

Teacher—Why are you late for school, James! James—I stopped two boys from fighting. Teacher—That's fine. How did you accomplish it? James—I liked them both.

If Sitting Bull had a good looking daughter would he call her Sitting Pretty?

1st Swede—Did you have me get on the boat last night? 2nd Swede—Yah. 1st Swede—Did I have my pants on?

Tom Sletto is the only native in captivity equipped with a jug of wine and two dozen eggs and throwing them into the

Miss Marjorie Rhodes, of Bellevue is a guest at the home of Mr. and Mrs. Clark Rhodes.

Leonard son of Mr. and Mrs. Guy Voisey took honors at Calgary in the recent music examinations.

Mr. and Mrs. J. Buchan returned home after spending their holidays at Pincher Creek and Waterton Lakes.

Dreemaking, plain sewing and all kinds of mending at very reasonable prices. For further information phone 74.

Mrs. Ivah Miller wishes to thank the O.E.S. and B.P.O.E. for flowers sent during her recent illness, and also the many friends for kind remembrances.

W. J. Porter and Harry Smith are among the first to be reported to be cutting rye, while Adam Ferguson is cutting barley. Doubtless there are others cutting either of these two grains.

G. M. Campbell returned from Calgary the first of the week and is again in harness in the store, although still experiencing more or less weakness. His new hirsute adornment is much admired.

Mr. and Mrs. W. R. McRae and Clyde Coe returned from the coast in time to vote on election day. Mr. McRae states they had a splendid trip in every way with an enjoyable time at the coast.

A. W. Jopling, returning from Lethbridge at 2 a.m. on Friday morning discovered a fire in front of Otto Miller's blacksmith shop which had taken hold on the sidewalk. Fortunately it was extinguished without serious difficulty.

Mr. and Mrs. P. O. Sommers returned from a six weeks' visit in Vancouver on Saturday last. Their trip was highly enjoyable in every way and they were delighted with the B.C. climate and the proximity of the ocean. They were the guests of their son, Dell Sommers.

Mr. and Mrs. J. J. Fields and family who had been the guests of Mr. and Mrs. F. J. Clapp returned to Calgary this week.

Now the energetic fly is coming into its own and swatters, fly paper and fly sprays will be big sellers for the next month.

Ed and Mike Beingsenior and Arthur Anderson returned from a fishing trip to the Livingstone river and Waterton Lakes.

Duane Chamberlain received a badly lacerated hand while assisting in repairing a school van at B. Hummel's blacksmith shop, and he will be laid up some time with it.

Quite extensive alterations have been made in the Hotel Savoy during the past week. A new parlour has been fitted up on the second floor and the change adds one to the number of rooms available. The Savoy is one of the most largely patronized of the country hotels by commercial travellers and tourists.

Polling day passed off very quietly here, the voters making their appearance in a more or less steady stream without bunching. Geo. Depue was deputy returning officer and Herbert Gill poll clerk, while Harry Higgins was scrutineer in the Garland interests. The result of this poll was 73 for Garland and 54 for Graham.

Vegetables and other exhibits for the Carmangay fair should be left at W. A. Summers residence by Wednesday afternoon or evening. Where this is inconvenient anything left at the Chronicle office will be sent from there to Mr. Summers, where the exhibit will be prepared.

Mr. and Mrs. H. G. Stagg of Edmonton and Mr. W. E. Warren and daughter of Seattle visited with Mrs. E. Gill on Sunday leaving Champion for their respective homes on Monday. Mr. Warren will be remembered as a partner in the Meat Market during the war.

At recent musical examinations held under the auspices of the Toronto Conservatory of Music at Lethbridge Ileen Collins achieved first class honors; Lona Stephenson, 2. Latiff and H. Hunt honours, while E. Molan, G. Farmer and C. Gottenburg made passes.

Mr. and Mrs. G. A. Orr and family left for Spokane on Thursday where they will spend part of their holidays, taking in other coast points while away. Mr. and Mrs. J. S. Collins and family accompanied them.
